Each year the Career Services office conducts a survey of graduates from the Rindge Campus regarding their post-graduation plans. Initial data is collected in May with a more formal survey being conducted the following December. Information on current employment status is collected through an electronic survey, phone calls, in-person contacts and social media.

Of the 208 individuals surveyed, career information was obtained from 98 graduates (47.1%)

Of those respondents:
- 61 (62.2%) are working in professional positions
- 9 (9.1%) are working in professional positions and attending graduate school
- 21 (21.4%) are enrolled in graduate school or planning on attending in 2015
- 1 (1%) is enrolled in AmeriCorps
- 6 (6.1%) are still looking for professional positions
