Use this worksheet to get an idea of what your class schedule will look like in the first semester. Fill in each of your first choice classes in the appropriate grid section above. If you have other time obligations, such as athletic practice, you can indicate that on the grid as well and use that as a guide to help you avoid requesting classes which conflict with your other obligations.

As you fill this out you will see that you will be spending a lot less time in class than you did in high school. It may appear that you have a lot of free time but keep in mind that it is expected that you will complete the majority of your work for each class outside of the scheduled time the class will meet. Consider whether you would find it more helpful to schedule some time in between each class in order to visit the library to do research, write papers or complete course readings or if it would work better for you to block your classes together during the day and then block out an equal or greater time during that same day for completing course readings and assignments.
